- Brief Introduction
- What to do before starting?
- First Steps

Brief Introduction

- The project mainly consists on the implementation of a Wi-Fi network in the Northern Quarter Area of Manchester.

What to do before starting?

- Create a work plan
- Coordinate with the Manchester Digital Development Agency (MDDA) in order to follow their model.
- Pick up a lot of information about the topic.
- Work with other students to improve our knowledge about the topic.

First Steps

- Start working in the planning during the following weeks.
- Coordinate with other students to test some technologies which can help in our projects.
- Ask partners for some useful information sources.

Thank you for your time!
